## **Intelligent Notification Application Adds Chicago-Based Health System as Client**

### *Ingalls Health System Utilizing Notifi in Radiology Department*

July 26, 2011: HIT Application Solutions (HIT) has recently deployed their flagship Notifi Intelligent Communication Engine at Ingalls Health System in Chicago, Illinois. Ingalls is utilizing a core capability of Notifi for Radiology critical test result management, result distribution, and for telephonic delivery of preliminary results.

Jack Branding, Ingalls Administrative Director of Radiology, stated, "Allowing providers to access preliminary results, while also getting critical information in a timely manner is essential in providing appropriate patient care. Notifi provides an automated mechanism to deliver critical communications to providers while giving our Radiologists piece of mind that the message was received."

"Ingalls is a very forward-thinking institution, and we look forward to an expanded use of Notifi in other clinical areas," said Brian Biddulph-Krentar, President and CEO of HIT.

#### **Ingalls Health System**

Ingalls Health System includes Ingalls Memorial Hospital, an independent, community hospital with clinical outcomes and nationally recognized patient care programs comparable to major medical centers. The 553-bed hospital is located on a 40-acre main campus in Harvey, Illinois. Ingalls Health System also includes South Chicagoland's only 24/7 urgent care centers in Flossmoor, Tinley Park and Calumet City; Ingalls Wellness Center in Homewood; and multiple community locations for advanced imaging, diagnostics and rehabilitation. Ingalls' more than 4,000 physicians, employees and volunteers help a half million residents of the south suburbs of Chicago each year to achieve physical, mental and spiritual well-being. More information can be obtained by calling 1-800-221-2199.
